Priya Mehta

Email: priya.mehta.mech@outlook.com | Phone: +91-98765-43210 | GitHub: priyamehta-eng
Target Countries for Graduate Study: Japan, South Korea, Canada

EDUCATION

Bachelor of Engineering in Mechanical Engineering

National College of Engineering (2020 - 2024)
CGPA: 7.10 / 10.0
Financial Need: High (requires full funding for graduate study)

TECHNICAL SKILLS

CAD/CAM: SolidWorks, AutoCAD, CATIA
Simulation: ANSYS, MATLAB, Simulink
Programming: Python, MATLAB scripting, Arduino
Core Areas: Thermodynamics, Fluid Mechanics, Robotics, Manufacturing

PROJECTS

1. Solar-Powered Water Desalination Unit

- Designed and tested a compact solar still achieving 72% recovery.
- Won 2nd place in national sustainable engineering competition.

2. Autonomous Line-Following Robot (Arduino, PID)

- Built a robot capable of navigating complex track layouts using PID control.
- Completed an 18-meter track in 32 seconds during inter-college robotics fest.

ACHIEVEMENTS

- 2nd Place, National Sustainable Engineering Design Challenge (2023)
- Published poster paper at ASME Student Conference on Renewable Energy Systems
